

PRODUCTION DEPLOYMENT GUIDE

SaaS SEO Audit

Live deploy kaise karein — step-by-step Hindi guide

Repository: github.com/geekyprem1/saas-seo-audit

Domain: saasseoaudit.com · Stack: Next.js 16 · Prisma 7 · Clerk · OpenRouter

Estimated time: 45–60 minutes

Contents

1. GitHub ready karna
2. Postgres (Neon) setup
3. Upstash Redis setup
4. Clerk auth setup
5. OpenRouter AI setup
6. Google PageSpeed API setup
7. Vercel deploy
8. Domain connect karna
9. Production verify
10. Troubleshooting

Prerequisites

Aapke paas yeh hona chahiye:

- Windows 10/11 with PowerShell
- Node.js 18+ installed (`node --version`)
- Git installed (`git --version`)
- GitHub account (free)
- Credit card (Vercel verification ke liye, free tier available)

Step 1: GitHub ready karna

Code already push ho chuka hai: github.com/geekyprem1/saas-seo-audit

Verify karo:

```
git log --oneline -3
```

Expected output:

```
de022bc chore: clean up duplicate .DS_Store in .gitignore
c5ea1a4 feat: SaaS SEO Audit MVP - ...
91a041a Initial commit from Create Next App
```

Step 2: Postgres (Neon) setup

Neon serverless Postgres — free tier 0.5 GB, MVP ke liye kaafi.

1. Browser me jao: **console.neon.tech**
2. **Sign up** with GitHub
3. **Create project** — name: `saas-seo-audit`, region closest to users
4. Connection details open karo
5. **Pooled URL** copy karo → `DATABASE_URL`
6. **Direct URL** bhi copy karo → `DIRECT_URL`

Tip: Dono URLs almost same hote hain, sirf hostname me `-pooler` difference hota hai.

Step 3: Upstash Redis setup

Rate limiting + AI response cache ke liye.

1. **console.upstash.com** → Sign up with GitHub
2. **Create Database** → name: `saas-seo-audit`, same region as Neon, TLS enabled
3. **REST API** section me se copy karo:
 - `UPSTASH_REDIS_REST_URL` — `https://xxx.upstash.io`
 - `UPSTASH_REDIS_REST_TOKEN` — long alphanumeric

Step 4: Clerk auth setup

1. **dashboard.clerk.com** → Sign up with GitHub
2. **Create Application:**
 - Name: `SaaS SEO Audit`

- Sign-in options: Email, Google, GitHub

3. **API Keys** se copy karo:

- `NEXT_PUBLIC_CLERK_PUBLISHABLE_KEY` (`pk_test_...`)
- `CLERK_SECRET_KEY` (`sk_test_...`)

Webhook setup (user sync ke liye)

1. Clerk dashboard → **Webhooks** → **Add Endpoint**
2. URL: `https://placeholder.com/api/clerk/webhook` (baad me update karenge)
3. Events: `user.created` , `user.updated` , `user.deleted`
4. **Signing Secret** copy karo → `CLERK_WEBHOOK_SECRET`

Important: Production me switch karna mat bhoolna — Clerk dashboard me *Configure* → *Production* toggle ON karo. Naye live keys (`pk_live_...` , `sk_live_...`) generate honge.

Step 5: OpenRouter AI setup

Gemini 2.5 Flash primary, DeepSeek fallback.

1. **openrouter.ai/keys** → Sign up
2. **Create Key** → name: `saas-seo-audit-prod` , \$10 limit
3. API key copy karo (`sk-or-v1-...`) → `OPENROUTER_API_KEY`
4. **openrouter.ai/credits** me \$5-10 add karo

Step 6: Google PageSpeed API setup

1. **console.cloud.google.com** → Create project: `saas-seo-audit`
2. **APIs & Services** → **Library** → search "PageSpeed Insights API" → **Enable**
3. **Credentials** → **Create API Key**, sirf PSI API restrict karo
4. Copy (`AIza...`) → `GOOGLE_PSI_API_KEY`

Test URL:

```
https://www.googleapis.com/pagespeedonline/v5/runPagespeed?url=https://example.com&key=YOUR_KEY
```

Step 7: Vercel deploy

Free tier me 100 GB bandwidth/month.

7.1 Account aur import

1. **vercel.com/signup** → Sign up with GitHub
2. **vercel.com/new** → Import `geekyprem1/saas-seo-audit`
3. Framework: Next.js (auto-detect)
4. Build/Install/Output defaults rakho

7.2 Environment Variables

Project Settings → **Environment Variables** me add karo:

Variable	Value	Env
<code>DATABASE_URL</code>	Neon pooled URL	All
<code>DIRECT_URL</code>	Neon direct URL	All
<code>NEXT_PUBLIC_CLERK_PUBLISHABLE_KEY</code>	<code>pk_live_...</code>	Production
<code>NEXT_PUBLIC_CLERK_PUBLISHABLE_KEY</code>	<code>pk_test_...</code>	Preview + Dev
<code>CLERK_SECRET_KEY</code>	<code>sk_live_...</code>	Production
<code>CLERK_SECRET_KEY</code>	<code>sk_test_...</code>	Preview + Dev
<code>CLERK_WEBHOOK_SECRET</code>	<code>whsec_...</code>	All
<code>OPENROUTER_API_KEY</code>	<code>sk-or-v1-...</code>	All
<code>OPENROUTER_MODEL_PRIMARY</code>	<code>google/gemini-2.5-flash</code>	All
<code>OPENROUTER_MODEL_FALLBACK</code>	<code>deepseek/deepseek-chat</code>	All
<code>GOOGLE_PSI_API_KEY</code>	<code>AIza...</code>	All
<code>UPSTASH_REDIS_REST_URL</code>	<code>https://...upstash.io</code>	All
<code>UPSTASH_REDIS_REST_TOKEN</code>	token	All
<code>NEXT_PUBLIC_APP_URL</code>	<code>https://saasseoaudit.com</code>	Production
<code>LOG_LEVEL</code>	<code>info</code>	All
<code>CRON_SECRET</code>	random string	All

7.3 First Deploy

Deploy button click karo. 3-5 min lagega. Preview URL milega.

7.4 Database migrate

Pehli deploy ke baad tables create karne hain:

```
cd C:saas-seo-audit
npx vercel login
npx vercel link
npx vercel env pull .env.production
npx prisma migrate deploy
```

Step 8: Domain connect karna

8.1 Vercel me add karo

1. Project → **Settings** → **Domains**
2. `saasseoaudit.com` type karo → **Add**
3. `www.saasseoaudit.com` bhi add karo

8.2 DNS records

Registrar (Namecheap / Cloudflare / GoDaddy) me:

Type	Host	Value	TTL
A	@	76.76.21.21	Auto
CNAME	www	cname.vercel-dns.com	Auto

8.3 SSL verify

5-30 min wait karo. Vercel me status **Valid** hona chahiye. Browser me lock icon check karo.

8.4 Clerk webhook URL update

1. Clerk dashboard → **Webhooks** → endpoint
2. URL: `https://saasseoaudit.com/api/clerk/webhook`

8.5 Production URL set karo

Vercel me `NEXT_PUBLIC_APP_URL` update karo → `https://saasseoaudit.com` → **Redeploy**.

Step 9: Production verify

9.1 Basic checks

```
curl -I https://saasseoaudit.com
curl https://saasseoaudit.com/sitemap.xml
curl https://saasseoaudit.com/robots.txt
```

9.2 Browser flow

1. **saasseoaudit.com** open karo
2. **Sign up** → Clerk modal khulna chahiye
3. Google ya Email se sign up karo
4. Redirect hoke `/dashboard` pe jaana chahiye
5. **Run audit** on `https://example.com` (30-60 sec)
6. Results page: score, breakdown, issues dikhne chahiye
7. AI recommendations har issue ke saath
8. **CSV export** download
9. **History** page me audit dikhna chahiye

9.3 Lighthouse score (bonus)

Chrome DevTools → Lighthouse → Run:

- Performance: 90+
- Accessibility: 90+
- SEO: 95+
- Best Practices: 90+

Step 10: Troubleshooting

Build fail: "DATABASE_URL is not set"

Vercel me `DATABASE_URL` add karo → **Redeploy**.

Clerk webhook 401

Signing secret re-copy karo. Vercel me `CLERK_WEBHOOK_SECRET` update karo.

Audit fails: "Failed to fetch site"

- OpenRouter key invalid → recheck
- PSI key missing → add karo
- Target site SSRF-blocked → public URL use karo
- Upstash down → Redis optional hai

Prisma: "relation does not exist"

`npx prisma migrate deploy` run karo production pe.

Domain not resolving

DNS 24-48 hours. Check: **dnschecker.org**. Vercel me status dekho.

Post-launch checklist

- ☐ Sentry setup (sentry.io) — error tracking
- ☐ Vercel Analytics enable
- ☐ Vercel Speed Insights enable
- ☐ Upstash monitoring check
- ☐ Neon monitoring check
- ☐ OpenRouter usage track (activity tab)
- ☐ Google Cloud quota monitor

Next milestones (10+)

- **Stripe checkout** — billing flow add karo
- **Competitor comparison** — 3 sites tak compare
- **PDF export** — `@react-pdf/renderer` se branded reports
- **Agency team seats** — up to 10 seats per workspace
- **White-label** — custom logo/colors on PDF
- **Email notifications** — Resend se audit complete pe email
- **Cron jobs** — daily cleanup, weekly summary email

- **Blog** — [src/app/blog/](#) for SEO content marketing

Quick reference: common commands

```
# Local development
cd C:saas-seo-audit
npm run dev

# Production build (local test)
npm run build
npm run start

# Database
npx prisma migrate dev      # local migration
npx prisma migrate deploy   # production migration
npx prisma studio           # GUI DB browser

# Linting
npm run lint

# Git
git add -A
git commit -m "your message"
git push
```

Generated for github.com/geekyprem1/saas-seo-audit · Best of luck bhai 🚀
Koi step atke to mujhse poocho — har service setup me help kar sakta hoon.
